**Artstream**  
**Project**

Artstream Project – a magnificent multi-faceted arts hub, is a facility in central Edmonton bringing artists from many disciplines together.

We desire to create a very special place where creativity can flourish. We believe that great art requires authentic, supportive, dynamic and resilient community. As artists, we do not create well in isolation. Bringing our resources together allows each to work in their strength. When collaboration happens extraordinary things are possible.

At Artstream, we want to do more than create a place to work, we

want to create a place to thrive. That way, we all are better able to spread our creativity and make an even greater contribution to our city's diversity and prosperity.

Within the Artstream Project you will find features that aim to serve the various needs of the artist: a collaborative creative community space where you are able to gather with other artists; several meeting rooms where you can work with clients or small groups; a gallery/show space; workshop space; teaching studio; individual and group studio space; secure art storage; and complete art printing and support services. All this and

more, conveniently located next to green space and close to the downtown core.

Long-term lease, monthly, scheduled and occasional contracts are available. Studio spaces are limited, so reserve today.

A place to  
*Flourish*  
ARTSTREAM PROJECT
